

dark red or blackish brown or even black
but never can become brownish black in yellow

Br. mottling in Zee Pine.

In recent years I have seen a large number of cases
and the most striking and among others particularly
noted was that of young timber found at Shallow
Creek south of mine west of Mineral Lagoon.

At Griffith Valley the tree more or less brown
but with some yellow colour when green might almost
be called white.

about 45 years old.

One bright mottled tree left after being
split and surface showing bright
brown colour by the side
of a dead tree with great
dark brown patches on it.

On Pella Hill about 65 years
old in pine forest on Lake M.
