

HE statistics of prices and quantities of the chief American and Russian Furs which I drew up on the occasion of the First International Sportsman Exhibition in Vienna 1910, and my exhibit itself which formed a „Fur Museum“ have created so much interest in trade circles, that I have been induced in order to comply with wishes for copies of the statistics, to lay before my business friends the following copy of the same revised and completed with a series of pictures of my exhibit.

As a supplement follow photographic views of my warehouses, factory etc.

I should be glad if the friends of my firm would study the album with interest.

Vienna (Austria), December 1910.

J. Z. SCHÜTZ.
