## REGULATIONS

### AS TO THE ADMISSION TO VIENNA UNIVERSAL EXHIBITION, 1873.

I. The Exhibition will be opened on the 1st May, and closed on the 31st October, 1873.

II. The hours of opening and closing the Exhibition each day will be published on the first of each month.

III. The entrances are as follows :—

1. Through the Wurstelprater in the western portal of the Industrial Hall.
2. Through the western portal at the end of the Machinery Hall, on the extremity of the Ausstellungsstrasse.
3. Through the southern portal in the principal avenue of the Prater.
4. Through the Rondeau Gate.
5. From the Exhibition Station.

IV. Holders of season and weekly tickets enter the Exhibition by the west and south entrances.

V. No change will be given at the entrances. For the convenience of the public an exchange office is established at each entrance.

VI. Season tickets are not transferable. The holder must sign his ticket and also a register, if required to do so by the proper officer. No compensation will be given for lost season tickets.

VII. Season ticket holders subject themselves by their signatures to the observance of all the provisions of these regulations.

VIII. The office for season tickets, 42, Praterstrasse, will be opened on the 21st April.

IX. A ticket is forfeited if used by anyone but the rightful owner, and such an offence is punishable by the Austrian law.

X. A weekly ticket costs five florins, available for seven consecutive days, seven coupons being attached to it. The holder of such a ticket may use one coupon a day or may exhaust his seven coupons by allowing other persons to use them, provided always that one coupon is equivalent to one visit.

XI. Weekly tickets will be issued on and after the 2nd May. They cannot be used, however, until the 4th May.

XII. A person cannot leave the Exhibition and return thereto without repayment.

XIII. The Prices of admission are as follows:—On Sundays and holidays, fifty kreuzers = 1 shilling; on each of the other six week-days, one florin = 2 shillings. The days of the opening, and of the distribution of prizes are excepted, the entrance price on those days being 25 florins = £2 10s. On the 2nd and 3rd May the entrance price is five florins = 10 shillings; and on the 4th May, two florins = 4 shillings. A season ticket for the whole time of the Exhibition costs 100 florins = £10 for a gentleman, and 50 florins = £5 for a lady. Tickets for ladies are, however, delivered only to those gentlemen who are already supplied with a season ticket.

XIV. Exhibitors' tickets are delivered only according to the general regulations of 27th January, 1873, to an Exhibitor, or to his representative, duly acknowledged as such by the Director General.

XV. Representatives of Exhibitors will only be acknowledged and provided with a ticket on a written application of the Exhibitor, to be addressed to the commission of his country. The Exhibitor will be responsible for any abuse of the ticket held by his representative.

XVI. Non-residents in Vienna, whether Exhibitors or their agents, can only receive admission tickets for the term of their stay in Vienna.

XVII. Each Exhibitor of a collective exhibition is entitled to a ticket of free admission. Firms of two or more members can only claim *one* such ticket.

XVIII. Assistants, actually employed in the Exhibition, will be supplied during the time of their employment, with monthly tickets, at the price of 6 florins = 12 shillings.

XIX. Exhibitors who contribute to temporary exhibitions will receive free tickets available only for the time that such temporary exhibition lasts.

XX. The tickets for the Jury and the Experts of the Jury will be available from the 1st of May to the end of August.

XXI. The President, the Vice-President, the Members of Foreign Commissions, as well as the Representatives of the Press, will receive honorary tickets of admission.

XXII. For the Administrative Officers of Foreign Commissions, the necessary number of tickets will be placed at the disposal of their Commissions. Assistants of foreign countries must, however, pay 6 florins for his monthly ticket, in accordance with Section XVIII.

\* \* \* \* \*

XXIV. All tickets (with the exception of the weekly tickets) will be issued on personal application at the Ticket Office of the General Direction, or to a messenger bearing the written authority of the person in whose name the ticket is to be issued.

**PRIZE MEDALS TO BE AWARDED AT THE VIENNA UNIVERSAL EXHIBITION.**

---

ACCORDING to the General Programme of the Exhibition, there will be five different kinds of Medals awarded as Prizes by the International Jury, namely—

1. MEDAL FOR FINE ARTS;
2. MEDAL FOR GOOD TASTE;
3. MEDAL FOR PROGRESS;
4. MEDAL FOR CO-OPERATORS;
5. MEDAL FOR MERIT.

The Medals will all be of the same size, each seven centimeters in diameter. They will all be in bronze, and will bear on the obverse the portrait of His Majesty the Emperor, with the inscription, in German :

“FRANZ JOSEPH I., KAISER VON OESTERREICH, KOENIG VON BOEHMEN, ETC., APOST. KOENIG VON UNGARN.”

(Francis Joseph I., Emperor of Austria, King of Bohemia, &c., Apostolic King of Hungary).

The reverse side of all five medals will be adorned with artistic emblems, the design of which has been left to the respective artists.

These emblems on the reverse side of the Medals will bear the following inscriptions :

1. On the Medal for Fine Arts—“Weltausstellung, 1873, Wien. Fur Kunst.” (*Universal Exhibition, 1873, Vienna. For Fine Art.*)
2. On the Medal for Good Taste—“Weltausstellung, 1873, Wien. Für guten Geschmack. (*Universal Exhibition, 1873, Vienna. For Good Taste.*)
3. On the Medal for Progress—“Weltausstellung, 1873, Wien. Dem Fortschritte.” (*Universal Exhibition, 1873, Vienne. For Progress.*)
4. On the Medal for Co-operators—“Weltausstellung, 1873, Wien. Dem Mitarbeiter.” (*Universal Exhibition, 1873, Vienna. To the Co-operator.*)
5. On the Medal for Merit—“Weltausstellung, 1873, Wien. Dem Verdienste.” (*Universal Exhibition, 1873, Vienna. For Merit.*)

The Medal for *Fine Arts* is reserved for distinguished art productions exhibited in Group XXV. It represents on the reverse side the Goddess of the capital of Vienna, with the mason's crown, by her side the genius, on whose lap rests a cushion with wreaths, and surrounded by the representatives of sculpture, architecture, and painting, whom she crowns with laurel wreaths.

The Medal for *Good Taste* is designed for Exhibitors of Articles of Industry, the form and colour of which constitute the characteristic features for adjudication. It shows on the reverse side three Greek female figures (Muses and Graces), surrounded by elegant objects of Art and Artistic Industry, which they are admiring.

The Medal for *Progress* is intended for Exhibitors in Groups I. to XXIII., and in Group XXVI., who, compared with the productions exhibited at previous Exhibitions, can prove noticeable progress made since then in new inventions, in the introduction of new materials and contrivances, &c. It represents a serious figure followed by immortality passing the Goddess of the country, who sends a genius with a laurel wreath to meet her.

The Medal for *Co-operators* is designated for such persons who, as managers of manufactories, as foremen, designers of patterns, modellers, or as assistants in a general way, are nominated on the part of the Exhibitors, on account of the leading part they have taken in the features of excellence of the productions, or in the increase of their sale. It shows on the reverse side a mechanic examining the parts of a machine, which his aspiring assistant has just finished, and for the completion of which, as an acknowledgment, the genius of labour presents him with a laurel wreath.

The Medal of *Merit* will be awarded to Exhibitors who can lay claim to excellence and perfection in material and workmanship, large extent of production, the opening of new markets, the employment of improved tools and machinery, and cheapness of produce. It shows on its reverse side the reward for labour and domestic industry.

2nd Section. Engraving and Guilloche work, Xylography.

3rd Section. Photography.

4th Section. Pattern Drawing and Paintings for Decoration.

## GROUP XIII.

## GENERAL MACHINERY.

*Preliminary Arrangement.*

Prime movers (steam generators, steam-engines, water-wheels, turbines, pressure engines, air, wind, and electro-magnetic engines, gas machines).

Machines for transmitting power (shafts, wheels, pulleys, bands, &c.).

Machinery for working special kinds of materials (machines for mining, metallurgy, metal work, and wood work; machines for spinning, weaving, knitting, sewing, and embroidering; machines for fulling, cleansing, shearing, dyeing; machines for bleaching, leather-dressing, &c.; machines for paper manufactures and bookbinding, for type-founding, printing, lithography, copper-plate printing, colour printing, &c.; machines and apparatus for sugar-making, oil manufacture, breweries distilleries, stearine, soap, candles, starch, ice-making, match-making, corn mills, and agricultural machinery and apparatus).

Other machinery not belonging to the above-mentioned (blast-engines, fire engines, pumps, ventilators, &c.).

Materials and parts of machinery.

Railway machinery (locomotives, tenders, railway velocipedes and parts of them, railway carriages and parts composing them, special machinery and apparatus for railway workshops and railway contrivances; for making and maintaining railway plant; snow ploughs, &c.).

Steam guages, dynamometers, tradiometers, &c.

All sorts of vehicles not concerned with rail.

Statistics of production.

*Groups and Sections for the Juries.*

1st Section. Prime-movers machines for transmitting power; parts of machinery.

2nd Section. Machines for working special kinds of material (with the exception of Agricultural Machines, which are classified in Group II).

3rd Section. Means of Transport and other plant for Railways.

4th Section. Street Locomotives, and other kinds of transport.

## GROUP XIII. A.

CROWN IRONWORKS, Glasgow. Ironwork. (563)

CLARKE, EDWARD, *Patent Crank Works, Lincoln.*—Cranks for Thrashing Engines and Machines; Pumps, Locomotives and Marine Engines; Ship's Winches, Pumps, Looms, &c., bent out of round bars of iron by hydraulic machinery. (376)

BLEZARD, JAMES, & SONS, *Padiham, Lancashire.*—Temples used on

Looms for Weaving Cotton, Woollen, Linen, and Silk Goods. School Desk, compound fastening. (616)

SIEBE & GORMAN, 5, *Denmark Street, Soho, London.*—Ice-making Machine. (681)

### GROUP XIIIa.

#### Agricultural Machinery.

BOBY, R., *St. Andrew's Works, Bury-St.-Edmunds.*—Barley Hummeller, Corn Screens, Corn-dressing Machines, Haymaking Machines, Hand Seed Drills, Malt Screens, Cask Bushes. (566)

ROBEY & COMPANY (LIMITED), *Perseverance Iron Works, Lincoln.*—Portable, Vertical, and Horizontal Engines; Thrashing Machines, with iron frames; Straw Elevators (Harvest Stackers); Corn Grinding Mills; Wood Sawing Machinery; Maize Sheller. (567)

(See Appendix.)

CLAYTON & SHUTTLEWORTH, *Stamp End Works, Lincoln; and at Vienna, Pesth, Prague, and Lemberg.*—Portable Thrashing Machines; Elevators for Straw, Hay, and Sheaf Corn; and other Agricultural Machinery. (568)

AVELLING & PORTER, 71, *Cannon Street, London, and Rochester, Kent.*—Agricultural Road Locomotive Engine with cylinder surrounded by steam and compensating gear for turning sharp corners, &c. suited for hauling heavy loads or driving fixed machinery; two waggons for use with the locomotive. (484)

HOWARD, J. & F., *Bedford.*—Steam Cultivating Apparatus, with Steam Plough, &c., complete; Ploughs, various; Grass, Seed, and Drag Harrows; Hay-making Machines; Horse Rake; Mowing and Reaping Machines. (442)

SMYTH, J., & SONS, *Peasenhall, Suffolk.*—Corn, Beet and Manure Drills; Broadcast Corn and Seed Sowing Machines; Manure Distributors. (570)

FOWLER, J., & COMPANY, 71, *Cornhill, London.*—Steam Ploughing Apparatus complete, and Steam Traction Engines; Clip-drums, &c. (571)

TURNER, E. R. & F., *St. Peter's Ironworks, Ipswich.*—Steam Engines, fixed and portable; Thrashing and Dressing Machine; Corn Grinding, Crushing and Kibbling Mills; Oil Cake Breakers; Maize Shellers, and Kibblers. (572)

HOUGHTON, W., & COMPANY, *Victoria Mills, Great Grimsby.*—Aspirator, Separator, Smutter, combined, for cleaning grain, two sizes. (573)

BAKER, J., *Falcon Works, Wisbeach*.—Corn Dressing and Screening Machines, made by Special Steam Machinery, and suitable for all Countries. (574)

MARSHALL, SONS, & COMPANY (LIMITED), *Gainsborough, Lincolnshire*.—Steam Engines, portable and fixed; Thrashing Machines, Corn Mills, Circular Saw Bench, and Sack-lifting Barrow. (575)

NICHOLSON, W. N., & SON, *Trent Ironworks, Newark*.—Portable Steam Engine, 8-horse power; Vertical Combined Engines and Boilers of 1 to 4-horse power; Haymaking Machines, Self-acting and other Horse-Rakes, Turnip and Root Cutters, Chaff Cutters, Oilcake Breaking Machine, and Winnowing Machine. (577)

FOLLOWES & BATE, *Dutton Street Works, Manchester*.—Lawn Mowing Machines, for hand and horse power, Chaff Cutter, Corn Grinding Mills, Meat Choppers and Mincers, Knife Cleaners. (578)

RUSTON, PROCTOR & COMPANY, *Sheaf Iron Works, Lincoln*.—Portable, Fixed, and Vertical Steam Engines, with patented improvements; Thrashing Machines, Patent Adjustable Corn Screens, Corn Grinding Machines, Maize Shellers; Wood Sawing Machinery, &c. (579)  
(See Appendix.)

RANSOMES, SIMS & HEAD, *Orwell Works, Ipswich*.—Portable Steam Engines for economising Fuel, for Burning Wood and Lignite, and for Strawalone; Steam Thrashing Machines for finishing the Corn for market, for export, also for hot countries, with apparatus for chopping and bruising the straw for fodder; Horse Rakes, and Haymakers; Double and Single Horse and Bullock Ploughs, especially adapted for the large corn districts of the east. (580)

COLEMAN & MORTON, *London Road Ironworks, Chelmsford, Essex*.—Cultivators for light, mixed, and heavy soils; Corn Screen for separating grain; Potato Digging Machine, Manure and Water Carts, Oil Cake Breakers, Hay Elevator, &c. (581)

HUNT & TAWELL, *Atlas Works, Earls Colne, Essex*.—Clover Seed Drawer;

Chaff Bruising Mills; Cutters; Root Gardner Turnip Cutters; Horse Gears; Pulpers; and combined Oat and Bean Mill. (582)

LEWIS & COMPANY, *Salopian Ironworks, Shrewsbury*.—Mowing and Reaping Machines, Chaff Cutters, Ploughs, Oil Cake Breaker, Root Pulpers, Turnip Cutters and Slicers. (583)

SAMUELSON & COMPANY, *Britannia Works, Banbury*.—Self-Raking Reaping Machines, and Grass Mowing Machines. (584)

BAMLETT, A. C., *Thirsk, Yorkshire*.—Reaping Machine; Self-Raking Combined Mowing and Reaping Machine; Manual Delivery Reaper. (585)

BARNARD, BISHOP, & BARNARDS, *Norfolk Iron Works, Norwich*.—Patent Lawn Mowers; Garden Seats and Chairs; Ornamental Wrought Iron Gates. (585)

HORNSBY, R. & SONS, *Spittlegate Iron Works, Grantham*.—Patent Portable Steam Engines; Thrashing, Shaking and Finishing, Dressing Machines; Reaping and Mowing Machines; Corn and Seed Drills and Manure Distributors; Ploughs; Washing, Wringing, Mangling Machines, &c. (587)

(See Appendix.)

WILLIAMS & COMPANY (LIMITED), *33, King William Street, City, London*.—Lawn Mowers called "Archimedeian," adapted for long and wet as well as short and dry grass, for Hand and Pony use. (588)

COULTAS, J., *Spittlegate, Grantham*.—Beetroot Drop Drill, with Artificial Manure Apparatus; Wright's Patent Potato Planter; Royal Corn and Seed Drill; Corn Broadcast Sowing Machine. (590)

PENNEY & COMPANY (LIMITED),  
*Lincoln.*—Patent Adjustable Rotary Corn-Screens ; Seed-dressing Machine; Canadian Cast Steel Forks ; Hoes, and Rakes. (591)

WOODS, COCKSEEDGE & WARNER, *Suffolk Ironworks, Stowmarket.*—Crushing and Grinding Mills for grain, linseed, &c., for steam power, price 17*l.* 17*s.* od. Ditto ditto, for horse or two-man power, 12*l.* Ditto ditto, for one man, 8*l.* 8*s.* od. Linseed and Malt Mill, price 6*l* 6*s.* od. “Universal” Mill, worked by a big boy, 6*l.* 6*s.* od. Portable Combined Steam Engines and Boiler, 9*l.* Corn Mill, with French burr, 23*l.* 10*s.* od. Oilcake Breakers, 3*l.* 10*s.* od. and 7*l.* Horse Gear, 14*l.* 14*s.* od. Root Pulpers, 3*l.* 12*s.* 6*d.* to 5*l.* Thrashing Machine, for horse-power, 36*l.* (592)

CLARKE & DUNHAM, 48, *Mark Lane, London.*—Grain-Cleaning Machines—Smut Machine, Separator, Sorter, Wirework; Millstone, Millstone Balance, Steel Smelt Wire, and Mill Bills; Needle Lubricators. (593)

GARRETT, R., & SONS, *Leiston Works, Suffolk.*—Portable Steam Engines and Thrashing Machinery; Corn-drills, Horse-hoes, Manure Distributors. (594)

RICHMOND & CHANDLER, *Salford, Manchester.*—Chaff-cutting Machines, Crushing Mills, and Horse Gear. (595)

WALLIS & STEVENS, *Basingstoke.*—Portable Steam Engine, 8 horse power, with Patent Feed Water Heater, price 255*l.*; Portable Steam Thrashing and Finishing Machine, price 145*l.*; Horse-power Thrashing Machine, 73*l.* 10*s.*; Model of Patent Folding Elevator (596).

CORCORAN, BRYAN, WITT & COMPANY, 28, *Market Buildings, Mark Lane, London.*—Corn Grinding Mill, with French Burr Stones, Smutting Machine and Corn Screen, and Wheat Separator; Wirework for Malt Kiln Floors, containing 6,912 meshes to the square foot; Steel and Iron Round and Square Bar Smut Wire, woven of any size, width, and number of holes; Chron-

drometer, with English, Austrian, or other scale, for ascertaining the Weight of Corn per bushel, &c.; Perforated Plates for Smut Machines; Cement for Malting Floors, Concrete, &c.; Silk used for Dressing Flour; Wirework for Paper Making, Sieves, and other uses; Rice Shelling, Cleaning, and Polishing Stones; Mill Implements and Tools; Pulley Blocks, Hoists, Leather Felting, Grindstones, Haircloth, &c.; Hand Drill and Seed Sower; Wire of all kinds. (597)

WILLSHER & COMPANY, *Brain tree, and 40, Gracechurch Street, London.*—Steam Engine; 8-horse power Expansion Portable Engine, with Enlarged Firebox; 8-horse power Portable Combined Thrashing and Corn Dressing Machine, to prepare corn for market. (599)

EDWARDS, G. B., *High House, Bredfield, Woodbridge.*—Drills for dropping beetroot seed in tufts or bunches; Drills for dry manure. (600)

CLARK BROTHERS & ODLING *Kirke White Street, Nottingham.*—Beaters for Thrashing Machines; Malleable Iron Castings. (601)

LEWIN, S., *Poole, Dorsetshire.*—Steam Engines, portable, fixed, and marine; Thrashing Machines and Elevators; Waggon Loader, Ploughs, and Circular Saw Bench; Portable Engine, 4-horse power, similar to the above-mentioned, with Thrashing Machine suitable for such engine; Strong and Simple Chaff Cutter. (602)

BARFORD & PERKINS, *Queen Street Iron Works, Peterborough.*—Corn Grinding Mills, Oil Cake Mills, Rollers; Steam Cooking Apparatus; Models of Road-roller, Steam Plough, and Campain’s Anchor for Steam Cultivation. (603)

FOSTER, W., & COMPANY, *Wellington Foundry, Lincoln.*—Eight horse Portable Steam Engine; Portable Thrashing Machine. (604)

REID, B., & COMPANY, *Bon-Accord Works, Aberdeen.*—11-row Patent “Disc” Corn and Seed Drill; 10-feet

Patent "Disc" Broadcast Sower, with Axle for transport; Winnower and Corn-dressing Machine; Patent 3-row Combined Beetroot and Manure Drill; Beetroot Raiser; Model of Wire Suspension Bridge, and Straining Pillar for Wire Fences; Models. (605)

PICKERING, JONATHAN, *Stockton-on-Tees*.—Patent Pulley Blocks and Sack Hoists. (606)

MILBURN, WILLIAM, 7, *Todd Street, Corporation Street, Manchester*.—Lawn Mowing, Rolling, and Collecting Machines. (607)

READING IRON WORKS, (LIMITED), *Reading, Berkshire*.—Steam Engines from 2 to 25-horse power, High Pressure and Condensing. (447)

DAVEY, PAXMAN & COMPANY, *Standard Ironworks, Colchester*.—Patent Vertical Engine, known as the "Davey-Paxman" Engine, with Boiler, Baffle Plate to regulate draught, and Water Tank Heater; Patent Steam Corn Dryer. (Boiler lent to Royal Commissioners for use.) (608)

PAGE, E., & COMPANY, *Victoria Iron Works, Bedford*.—Ploughs, Harrows, Horse Rakes, Root Pulpers, Oat and Maize Mills, Oil Cake Mill, &c.; Brick and Pipe-making Machines; Peat-Pressing Machines. (609)

MURRAY, G. W., *Banff, Scotland*.—Thrashing Machines for horse and hand-

power; Endless Chain Pump for lifting thick and other liquids; Double-furrow Plough, and combined Plough and Sub-soiler, on antifriction wheels; Fencing Wire Straining Brackets for wood and iron posts. (610)

(See Appendix.)

NALDER & NALDER (LIMITED), *Challow Ironworks, Wantage, Berkshire*.—Combined Steam-power Thrashing and Dressing Machine for preparing grain for market. (611)

BURGESS & KEY, *Holborn Valley Viaduct, London*.—Reaping Machine for two horses, invented by Mr. C. McCormick of the United States of America, and made by exhibitors, delivers the corn, when cut in sheafs, clear of horses' feet; these machines are also adapted for light horses or bullocks. (612)

BAKER, T., *Whitewall Iron Works, Compton, Berks*.—Double Blast Corn Dressing and Winnowing Machine, with six Wire Sieves to suit different descriptions of Corn. (613)

BRIGHAM & COMPANY, *Tweed Implement Works, Berwick-on-Tweed*.—Mowing Machine, the "Star," 17*l.* 10*s.*; Reaping Machines; Self-acting "Improved Excelsior," 34*l.* (237)

## ADDITIONAL EXHIBITIONS.

This collection has for its object to illustrate practically, as well as statistically, the nature and extent of the Imports of Raw Material into the Kingdom of Great Britain. As far as practicable, specimens have been procured, which show the general quality of each substance, and the varieties which are originated in different localities; at the same time, the scientific names of the producing animals or plants being generally attached to the articles, will give an interest alike to the man of science and the merchant. The large labels, in addition to a description of the group of substances to which they refer, contain also the statistical information which our Trade-returns show annually, and as these returns are never quite completed until the middle of the year, it has been decided to exhibit the Imports of 1871 instead of 1872, as more accurate information could be obtained of the former than of the latter. The various important firms, without whose help such a collection would have been impossible, have spared neither time nor trouble in aiding the collector, and in many instances these contributions represent considerable money value; and they have helped the more readily, because it has been suggested, that the collection, at the close of the Exhibition, should be left in the Austrian capital, as a contribution to any Polytechnic Institution which may be selected to receive it.

## BRITISH COLONIES.

## VICTORIA.

Victoria is situated at the south-east of the continent of Australia, and is bounded on the west by the Colony of South Australia. On the north and north-east by the Colony of New South Wales, and on the south and south-east by the Southern Ocean. The area of Victoria is 86,831 square miles, or 55,571,840 acres. The whole continent of Australia is estimated to contain about 3,000,000 of square miles, and Victoria consequently occupies barely a thirty-fourth part of its surface. Great Britain, exclusive of the islands in the British seas, contains 89,644 square miles, and is therefore slightly larger than Victoria. Wheat produced in Victoria, in 1870, was 5,697,056 bushels; horned cattle, 721,096; 76,334,480 lbs. of wool was exported in 1871. From its geographical position, Victoria enjoys a climate far more genial to Europeans than any other colony within the continent of Australia. In regard to heat, the weather is never severely oppressive except during the prevalence of hot northerly winds, and these occur only at intervals during the summer months.

The quantity of gold raised from the date of the first discovery (1851) to 31st Dec., 1871, is estimated at 40,749,848 ozs., which at 4*l.* per oz. gives the value as 162,699,392*l.*

There are 330 miles of railway completed in Victoria, and in full operation.

A large extension of the various lines is now being carried out.

Stage-coaches run to all parts of the Colony, except those for which railway communication is available.

**RATES OF LABOUR ON FARMS.**—The average rate of wages on farms, which varies considerably in different districts, is, ploughmen, per week, 26*s.*; farm labourers, per week, 17*s.*; married couples, per annum, 57*l.* 10*s.*; females, per week, 10*s.* 8*d.*; mowers per week, 29*s.* 6*d.*, per acre, 6*s.*; reapers, per week, 31*s.*, per acre, 15*s.*; threshers, per bushel, 6*d.*

**RATES OF LABOUR ON STATIONS.**—The average rate of wages on squatting stations is:—Stockmen, per annum, 45*l.* 6*s.* 6*d.*; shepherds, per annum, 35*l.*; hutkeepers, per annum, 28*l.* 3*s.* 6*d.*; married couples, per annum 51*l.*; females, per annum, 26*l.* 14*s.*; station labourers, per week, 16*s.*; sheepwashers, per week, 18*s.*; shearers, per 100 sheep shorn, 13*s.* 5*d.* This is also subject to variation in different districts.

**LIVE STOCK ON FARMS AND STATIONS.**—The number of live stock on farms and stations in 1870 was estimated at—horses, 161,830; milch cows, 179,661; cattle, 512,857; sheep, 9,923,663; pigs, 111,464; total, 10,889,475.

**EXTENT AND VALUE OF GOLD WORKINGS.**—A return made during the year 1869 gave—number of distinct quartz reefs proved to be auriferous, 2,881; extent in square miles of auriferous alluvial and quartz ground worked upon, 905 $\frac{3}{4}$ ; estimated value of gold mining claims, 8,539,241*l.*

#### NEW ZEALAND.

The Colony of New Zealand consists of three principal islands, called respectively the North, the Middle, and the South (or Stewart's) Island, and several small islets (mostly uninhabited); the chief of which are the Chatham Isles and the Auckland Isles. The three principal islands extend in length 1,100 miles, but their breadth is extremely variable, ranging from 46 miles to 250 miles; the average being about 140 miles.

**STATISTICS OF NEW ZEALAND.**—The census of 1871 showed that the population of New Zealand (exclusive of the Aborigines), amounted in the February of that year to 256,393; having increased from 99,021 in 1861. The revenue, the trade, and the other elements of material prosperity have increased during the same period in nearly equal proportions. Thus the revenue was in 1861, 691,464*l.*, and in 1871, 1,342,116*l.* The population of the chief towns, (including their suburbs) was in 1871, in round numbers, as follows:—Wellington, (the seat of the General Government), 8,000; Dunedin, 21,000; Auckland, 20,000; Christchurch, 12,000; Nelson, 6,000.

**REVENUE, (ORDINARY AND TERRITORIAL).**—1860, 464,739*l.*; 1870, 1,384,639*l.*; 1871, 1,342,116*l.* Public Debt of New Zealand in 1872 was, 9,983,341*l.*

**IMPORTS AND EXPORTS.**—1860, Imports, 1,548,333*l.*; Exports, 588,953*l.* 1870, Imports, 4,639,015*l.*; Exports, 4,822,756*l.* 1871, Imports, 4,078,192*l.*; Exports, 5,282,084*l.*

**LAND AND CROPS.** (*Land and cultivations of aboriginal natives not included*).—The extent of holdings in the Colony in February, 1871, was returned as 22,774,498 acres, against 18,762,057 acres in December, 1867, viz.: freehold, 5,637,838 acres, against 5,068,440 acres in 1867, and leasehold, 17,126,660 acres in 1871, (against 13,693,617 acres in 1867). The total number of acres fenced was 6,778,773, against 3,455,588 in 1867. The quantity of land broken up but not under crop, was, in 1871, 116,204 acres, against 94,311 acres in 1867. The total quantity of land under crop, as shown by the Census of 1871, (including sown grasses) was, 1,042,042 acres, against 676,909 acres in 1867. In this total were 77,082 acres of wheat, against 47,786 acres in 1867; 123,135 acres of oats, against 101,563 acres in 1867; 23,071 acres of barley, against 13,136 acres in 1867, 12,901 acres of potatoes, against 14,372 acres in 1867; 776,402 acres of sown grasses, against 472,893 acres in 1867. In other crops there were 29,450 acres, against 27,159 acres in 1867.

**ANNUAL PRODUCTION OF BUTTER AND CHEESE.**—The annual production of butter in the Colony, according to the Returns of February, 1871, was 5,199,072 lbs., against 3,834,252 lbs., in 1867; and of cheese, 2,547,507 lbs., against 1,300,082 lbs. in 1867.

**LIVE STOCK.**—The aggregate number of live stock of all kinds (excepting poultry,) in 1871, was 10,382,540, against 8,924,520 in 1867. Taking the principal kinds of live stock separately, the numbers were—horses, 81,078 in 1871, against 65,615 in 1867; cattle, 436,592 in 1871, against 312,835 in 1867; sheep, 9,700,629 in 1871, against 8,418,579 in 1867; and pigs, 151,460 in 1871, against 115,104 in 1867.

**IMMIGRATION AND EMIGRATION.**—The immigration (over seas) to New Zealand in 1870, amounted to 9,124 persons, of whom 6,178 were males, and 2,946 were females. Of the males 5,508 were adults, and 670 children; of the females 2,400 were adults, and 546 children. The following figures show the immigration in 1870, classified according to the countries from which the immigrants arrived:—United Kingdom, 2,266 males, 1,749 females; total, 4,015. Australian Colonies, 3,517 males, 1,126 females; total, 4,643. Other British Ports, 9 males, 1 female; total 10. Foreign States, 386 males, 70 females; total, 456.

**TRADE AND INTERCHANGE.—SHIPPING.**—The numbers and tonnage of vessels entered inwards and cleared outwards at the several ports of New Zealand during the year 1870 were as follows:—The total inwards was 756 vessels, of 273,151 tonnage. The total outwards was 766 vessels, of 265,407 tonnage. Of the total of 756 vessels inwards, 76, of 56,874 tonnage, arrived from the United Kingdom; 556, of 184,904 tonnage, from the Australian Colonies and other British possessions; and 124, of 31,373 tonnage, from foreign countries (including the southern whale fisheries). Of the total of 766 vessels outwards, 58, of 43,532 tonnage, cleared for the United Kingdom; 548, of 182,876 tonnage, for the Australian Colonies and other British possessions; and 160, of 38,999 tonnage, for foreign countries (including the southern whale fisheries). Of the 756 vessels inwards, 145, of 85,643 tonnage, were British; 553, of 167,869 tonnage, colonial; 45, of 15,361 tonnage, American; 4, of 569 tonnage, German; 3, of 427 tonnage, French; 2, of 1,025 tonnage, Norwegian; 1, of 1,000 tonnage, Russian; 1, of 536 tonnage, Swedish; 1, of 385 tonnage, Hawaiian; and 1, of 336 tonnage, Dutch. Of the 766 vessels outwards, 133, of 78,197 tonnage were British; 574, of 166,812 tonnage, colonial; 44, of 15,115 tonnage, American; 5, of 2,228 tonnage, Norwegian; 3, of 568 tonnage, German; 3, of 427 tonnage, French; 2, of 673 tonnage, Dutch; 1, of 1,000 tonnage, Russian; and 1, of 387 tonnage, Hawaiian.

**IMPORTS AND EXPORTS.**—The total value of the imports of the colony in 1870 was 4,639,015*l.*, against 4,976,126 in 1869, being a decrease of 337,111*l.* or 6·77 per cent. A comparison of the total value of imports in 1869 and 1870, according to the countries whence they were received, gives the following results:—

United Kingdom ..	£2,458,579 ..	£2,685,736 ..	increase £227,157
British Colonies ..	2,280,135 ..	1,759,872 ..	decrease 520,263
Foreign States ..	237,412 ..	193,407 ..	" 44,005
Totals .. ..	4,976,126 ..	4,639,015 ..	decrease 337,111

The total value of the exports from New Zealand in 1870 was 4,822,756*l.*, against 4,224,860*l.* in 1869, being an increase in 1870 of 597,896*l.*, or 14·15 per cent. Excluding the value of imported goods re-exported from the colony, the total value of exports of New Zealand produce and manufactures in 1870 amounted to 4,544,682*l.*, against 4,090,134*l.* in 1869, being an increase of 454,548*l.*, or 11·11 per cent. The two very important exports—gold and wool—demand more particular notice here. The total value of the gold exported from New Zealand in 1870 was 2,157,585*l.*, produced by the several gold-fields to the following amounts, viz., Auckland, 319,146*l.*; Marlborough, 7,408*l.*; Wellington, 120*l.*; Nelson, 591,510*l.*; County of Westland, 578,707*l.*; Otago, including Southland, 660,694*l.* The total value of gold exported in 1869 was 2,362,995*l.*

There appears therefore a net decrease in 1870, amounting to 205,410*l.* The falling off in amount occurred in Auckland, Nelson and Westland, while in Marlborough and Otago there was an increase. The total quantity of gold exported from New Zealand from the 1st April, 1857, to the 31st December, 1870, was 5,542,849 ounces; the total value, 21,565,479*l.* The total quantity of wool exported in 1870 was 37,039,763 lbs., against 27,765,636 lbs. in 1869, being an increase of 9,274,127 lbs. The total value stated for 1870 was 1,703,944*l.*, against 1,371,230*l.* in 1869, showing an increase of 332,714*l.*, or 24·26 per cent.

#### I.—PRECIOUS METALS, MINERALS, AND SOILS.

##### 1 Samples of Alluvial Gold from the following districts of Otago:—

- (1.) Opunake Diggings, Southland: Fine Gold, with Platinum and Black Sand.
- (2.) Moeraki: Fine Gold, with Garnet Sand.
- (3.) Tuapeka: Blue Spur Sluicing Gold from older drifts.
- (4.) Dunstan: Gold from River Beaches.
- (5.) Shotover: Black Gold from Terraces.
- (6.) Wakatipu: Rough Scale Gold from the Lake Terraces.

##### 2 Samples of Alluvial Gold from Westland:—

- (7.) Okarita: Fine Beach Gold.
- (8.) Ross: Deep-Sinking Gold.
- (9.) Hobo: Scale Gold from the older drifts.
- (10.) Greenstone: Coarse Gold from the ground sluicing.

##### 3 Samples of Alluvial Gold from Nelson:—

- (11.) Lyall: Nuggety Gold.
- (12.) Wakamarina: Shotty Gold.

##### 4 Reef Specimens from the following Gold Mines, viz.:—

Otago: Shotover, Cromwell, and Waipouri.  
Nelson: Reefton, Lyall, and Collingwood.  
Auckland: Thames and Coromandel.

##### 5 Gold and Silver as prepared for export, in 10 oz. ingots:—

- (1.) Melted Gold from South Island, alloyed with Copper Assay.
- (2.) Melted Gold from the Thames, alloyed with Silver Assay.
- (3.) Refined Gold, prepared by the Chlorine process.
- (4.) Melted Silver, prepared from the native Alloy by the Chlorine process.
- (5.) Cake of Silver Chloride formed by same process.
- (6.) Gold Specimens from Perseverance Mine.

##### 6 Gilt Models of the largest-sized Ingots exported from the country.

#### 6A Blocks of Coal from different mines.

##### 7 Blocks of Haematite.

##### 8 Blocks of Steatite.

##### 9 Box of Graphite.

##### 10 Box of Copper Ore.

##### 11 Box of Galena and Blende.

##### 12 Box of Auriferous Quartz.

##### 13 Black Sand (*Titaniferous*).

##### 14 Articles manufactured therefrom.

##### 15 Bottles of Crude Petroleum from Taranaki.

##### 16 A Collection of Rocks, Minerals, and Fossils, illustrating the Geology of Otago.

&c. &c. &c.

#### II.—TIMBERS OF THE COUNTRY.

##### 1 A large Collection of Native Woods.

##### 4 Specimens of large Manuka Tree (*Leptospermum scoparium*).

##### 5 Specimen of "Yellow Pine."

##### 6 Slab of the same.

##### 7 Piece of Old Tree.

##### 8 Sashes, Doors, &c., of local manufacture.

**9** Several Cabinets made of New Zealand Woods, and showing very high workmanship.

**III.—RAW PRODUCE**, including Kauri Gum, Whale Oil, &c.

**1** Wools (in fleeces, with full particulars attached) in illustration of one of the principal industries of the Colony.

**2** PHORMIUM FIBRE, in bulk and in sample.

**3** AN EXTENSIVE SERIES OF SPECIMENS to illustrate the qualities and capabilities of the Phormium Fibre.

#### IV.—MANUFACTURES:—

Woollen Goods, Tweeds, &c.; Mats and Cordage; Malt, Flour, &c.; Preserved Meats, Fish, and Fruits; Salt Beef and Pork; Soap and Tallow; Leather, Glue, &c.; Tobacco and Cigars.

#### V.—MISCELLANEOUS:—

Botanical Collections; Maps and Photographs; Skeletons of the Dinornis; Collections of Birds, &c.; Specimens of Native Manufactures.

### C E Y L O N

Is a magnificent Island off the southern extremity of Hindostan, containing about 15,808,000 acres. Part of it was taken possession of by England in 1795-6, but it was not till 1815 that the whole Island came under British Rule. Not a tenth part of the land is as yet cultivated. The population numbers 2,198,884. The revenue for 1871 was £1,121,679; the expenditure, £1,064,184. The value of goods imported in that year was, £4,797,952; of exports, £3,634,853. The principal articles of export are Coffee, Cinnamon, Tobacco, Plumbago, Cocoanut Oil, and Fibre. The Pearl Fisheries, which for some years were a source of revenue, have for the present failed. A great deal of jewellery is made in parts of the Island and worn by the natives. Specimens are exhibited.

A brief explanation of the use of the Peasant Jewellery sent to the Vienna Exhibition may be interesting.

#### JEWELLERY WORN BY MEN.

1. A pair of Earrings, "Kuvalai," worn by all classes of the Tamils, though not by all individuals; the lobe of both ears are perforated, and the jewel is hung on the hole, so that the ball of the ring is facing. They are worn on all occasions, beginning from the time a young man passes his minority.

2. "Sevappoddu," as above.

3. Three pairs of Earrings, called "Naddokkadukkan." These are worn in the same manner as above by the Tamils, mostly by those of country parts; hence they are called "Naddokkadukkan," which means earrings of the interior.

4. Two pairs of Finger-rings. They are called, "Venmaddum" and "Kootheraykulampu." "Venmaddum" means plain work. "Kootheraykulampu" means horse-hoof. "Venmaddum" is worn in pairs, on the ring-finger, and the other on the little finger of the right hand.

5. Silver Waist-chain worn round the waist, inside the dress, to sustain a piece of cloth to cover the nakedness in bathing, &c.

## JEWELLERY WORN BY WOMEN.

1. Ear ornament, "Vaaly." The Tamil women, except the Brahmin class, and people from India and their descendants, wear this on ordinary occasions; the upper parts of the ears are perforated in such a way as to receive the joints of the two pieces of "Vaaly," and keep the ornament in a vertical position.
2. Five pairs of Earrings.—See explanation given for 1 and 3.
3. Ear ornament, "Kathuppu," worn in the ear, in the same hole in which earrings are worn, but this ornament stands over the earrings.
4. Nose ornament, "Mookuttie," in a bore on the left side end of the nose.
5. A Necklace, "Karisamany." Several kinds of necklaces are worn by women, above the collar bone; but this is worn around the upper part of the neck.
6. A Necklace, "Thaddumany," worn below "Karisamany."
8. A Necklace, "Maniaddial," worn as an addition to "Karisamany," and sometimes instead of "Karisamany," but its place is between the "Karisamany" and "Thad-dumany."
9. Wedding Necklace "Thaly" and "Charadoo," worn by women from the day of marriage during the life of their husbands. The meaning of the "Thaly" differs in object from that of wedding-ring of other nations; the Tamil women wear it as a sacred mark to distinguish themselves from unmarried women and widows. "Thaly" is the round solid ornament in the middle of the gold string "Charadoo," which is worn in front.
10. Silver Arm-ring, "Kadasam;" bangles worn on the arm near the wrist.
12. "Valayal," worn as above—four on each arm.
13. Finger-rings, worn on the index finger, ring-finger, and little finger of the left hand—from two to four rings on each finger.
14. "Kaal Motheram," or toe-rings, worn one on each of the four toes of both feet except the big toe.
15. Five-stringed beads, worn round the neck to hang over the breast, the shortest string near about the collar bone.
16. Two-stringed beads "Larye," worn beneath the five strings.
17. Hair-pins.

The colour of these jewels is not the natural colour of gold. The Tamils, being dissatisfied with its natural colour, give it an artificial one. The ingredients and the process employed for fixing the colour are the following:—After the jewel is made and completed it is heated, and then put into a solution of salt. The quantity of water used for the solution is just sufficient to cover the jewel. The gold then turns white, and is cleaned by rubbing it with soft white sand. The jewel is then put into a solution, composed of salt and alum in equal quantities, and in alum and saltpetre twice as much, and is treated till the whole solution is evaporated and slightly heated, when it assumes a yellow colour. It is then dipped in water, and cleaned with soft white sand, and again heated in the last-named solution; cleaned with sand and polished.

This colouring is further carried on as follows:—A solution is made of acid of Gorga fruit or Tamarind, and a very slight quantity of brimstone, and what remains of the last solution, or rather its dregs, after evaporation, and heated. When the solution begins to boil, the jewel is put into it, and moved about until the desired colour is obtained.

The silver jewels also admit of colouring. The process is nearly the same as in the case of the gold, but the use of brimstone is avoided, and they are principally dipped in a solution of lime.

In ancient times there were distinctions as to what jewels certain classes of people should wear, and what classes should not, and also as to town fashion and country fashion; but they are now worn indiscriminately by all classes of the people, and by the people of all districts.

## MAURITIUS.

An island in the Indian Ocean, 400 miles east of Madagascar, captured by the British in 1810. The area of the island is 676 miles. The resident population of Mauritius, according to the census taken on the 10th of April, 1871, was composed of 51,771 males of the general population and 48,013 females, and 141,804 males of the Indian population and 74,454 females—total, 316,042. Between the 10th April and 31st December, the excess of births over deaths in the former class amounted to 479 males, and 579 females. In the latter there was an excess of 136 deaths in the males, and an excess of 823 births in the females. The arrivals, however, of Indian immigrants exceeded the departures by 433 males and 364 females, thus raising the total resident population to 318,584 classified as under:—General population, males, 52,250; females, 48,592. Indian population, males, 142,101; females, 75,641. It has been found impossible to follow the movements of the general population, or even of those of free Indian passengers, since the repeal of Ordinance No. 24 of 1850. The total estimated population on the 31st of December, male and female, may be taken as correct; but as the births and deaths of some Creole Indians, number at present uncertain, have been registered as belonging to the general population, the latter is probably a little over-estimated. Revenue (1871), £616,952; expenditure, £600,961. The principal article of produce is Sugar, and the cultivation of the cane is carried on in plantations, which employ 60,000 or 70,000 immigrants, introduced from the Presidencies of India. On the 10th April, 1871, the Indian population on the sugar estates was as follows, according to the census taken on that day:—

		Males.	Females.	Total.
Immigrants—From Calcutta	.. .. ..	36,815	12,836	49,651
,, Madras	.. .. ..	18,086	9,090	27,176
,, Bombay	.. .. ..	5,035	2,143	7,178
Indo-Mauritians	.. .. ..	16,192	14,863	31,055
Free Indian Passengers	.. .. ..	40	12	52
Total	.. .. ..	76,168	38,944	115,112

The value of imports and exports during 1871, deducting specie, has been respectively £1,807,382 and £3,053,054. There is little doubt that the value of exports given by the Blue Book last year was under-estimated. A comparison with those figures, therefore, will not be of much use. The exports in 1871 may, however, be roundly stated as having exceeded those of 1870 in value by £450,000, and this excess is accounted for by the larger quantity of sugar shipped in the former year. The quantities and value of the sugar exported during the last five years are given below:—

	Tons.	Value.	Average price per cwt.
1867	100,000	£2,156,950	18s. 4d.
1868	99,000	2,143,166	21 10
1869	107,000	2,599,815	22 10
1870	102,000	2,549,881	24 11
1871	123,000	2,819,944	22 7

The goods exhibited are as follows:—

## GROUP II.

CALDWELL, J., & MRS. DE CHAZAL.  
MOON.—Lithographs of Canes, introduced into Mauritius by Mr. Caldwell, coloured by Mrs. Moon; Report on New Caledonia; Classification of Sugar Canes; Plates of Paintings made in Queensland, New South Wales, and Mauritius; Sugar Canes painted from nature in Queensland, in New South Wales, and Mauritius.

HORNE, J., Sub-Director, Royal Botanical Gardens.—Collection of Fibres sent from the Royal Botanical Gardens, Mauritius.

HORNE, J., Sub-Director, Royal Botanical Gardens.—63 Sections of Wood, of which 43, from No. 1 to No. 43, are from indigenous trees.

## GROUP IV.

WIÉHE, JAMES.—Sugar, 14 Samples.

PITOT HONOURABLE H.—Sugars A B C, crystallised in the Vacuum Pan, different sizes of Crystals, filtered and manufactured without animal charcoal, and purged by turbines. The juice of the sugar-cane has been treated according to Dr. Icery's process. These three boxes, with the one marked F, are white "Vesou" sugars. Sugars D and E have been treated in the same manner as above, with larger Crystals, and have been made from the syrup or refuse from the "Vesou" sugars.

FLORE MAURICIENNE.—24 Bottles Preserved Fruits.

MOIZEAU, H.—Pickles.

STRONG, WIDOW J.—Pickles.

DUMAT, C.—Statistics of Sugar Production; Plan of first-class Sugar Mill.

*A full and classified catalogue of the contributions from Mauritius has been printed by order of the Commissioners.*

## GROUP V.

BOURGUIGNON & COMPANY.—Rope made of Aloe Fibre (*Pourcroya Gigantea*), 6 sizes.

D'UNIENVILLE, —.—Raw Silk.

## GROUP XII.

KYSHE, J.—Mauritius Almanack, 1872 and 1873.

MOCO, —.—Photographs; Types of the Chinese, Indian, and Mozambique inhabitants of Mauritius; Views of Landscapes, &c., in Mauritius.

## GROUP XVII.

MELDRUM, C., *Government Observatory*.—Meteorological Charts.

JOURDAIN, HONOURABLE H.—Madagascar Products: Silk Lambas, Grass Cloth Nattes, Fine Grass Cloth; Flax, Silk, Fibre, Cord; India Rubber, Cigar Cases; Spoons, Fork, Cups, and Specimen of Crystal.

## WEST AFRICAN SETTLEMENTS.

## SIERRA LEONE, GOLD COAST, GAMBIA, AND LAGOS.

The total population of these settlements, which are held by Great Britain principally with a view of putting an end to the Slave Trade, amounts to 513,370 persons.

The revenue of each separate Settlement from 1866 to 1871 was as follows:—

	1866.	1867.	1868.	1869.	1870.	1871.
Sierra Leone...	£ 62,263	£ 64,871	£ 59,272	£ 69,617	£ 67,135	£ 80,486
Gold Coast .....	11,053	10,839	15,404	24,127	30,851	28,609
Gambia .....	19,079	22,415	22,088	15,518	18,969	17,490
Lagos .....	23,823	30,195	33,896	40,622	42,875	45,612
Total revenue of H.M. West African Settlements }	116,218	128,320	130,660	149,884	159,830	172,197

The expenditure has generally been kept well within the revenue, as may be seen from the following figures:—

## EXPENDITURE.

	1866.	1867.	1868.	1869.	1870.	1871.
Sierra Leone...	£ 60,532	£ 70,984	£ 55,694	£ 70,465	£ 68,033	£ 76,130
Gold Coast .....	11,589	10,993	11,651	18,836	35,609	29,094
Gambia .....	17,681	18,664	17,082	20,236	21,937	16,662
Lagos .....	23,602	30,195	33,711	39,431	42,379	45,611
Totals .....	113,411	130,836	118,138	148,968	167,958	167,497

The following Table is a summary of the Trade returns in the four Blue Books for 1871. It shows, at a glance, the value of the commerce of the British Settlements:—

## IMPORTS AND EXPORTS.

	Imports.	Exports.	Vessels Entered.	Vessels Cleared.	Tonnage Entered.	Tonnage Cleared.
Sierra Leone.. . . . .	£ 305,849	£ 467,755	411	409	110,646	110,919
Gold Coast .. . . . .	250,671	295,207	343	315	131,553	119,494
Gambia .. . . . .	102,064	153,100	229	211	51,853	47,994
Lagos .. . . . .	391,653	589,802	278	275	125,776	125,168
Totals .. . . . .	1,050,237	1,505,864	1,271	1,210	419,828	403,575
Total commercial movement	2,556,101					

Thus, over twelve hundred vessels entered and cleared with cargoes exceeding two millions and a half in value.

These are the actual results of the year 1871. Since then two changes have been made, the effects of which are becoming already manifest, namely, the addition of the Dutch possessions in Guinea to the British Settlements, and the general revision of the tariffs, with a view of encouraging trade and shipping. Owing to these changes, it is probable that the exports from Her Majesty's West African Settlements will exceed £2,000,000 in 1873, and that the imports will reach £1,500,000, which would give a total commercial movement of £3,500,000; a larger sum than is exhibited by three not unimportant possessions put together, viz., the Federal Colony of the Leeward Islands, Tasmania, and Western Australia.

## MANUFACTURES.

In Kambia some attempt is made at manufactures. From the cotton shrub that grows near every house the women pluck the raw material, from which they spin a coarse strong thread, which is woven in a native loom made of hard wood and leather prepared by themselves.

In the verandahs of the native houses the country cloth, from which are made tobes and other articles of wearing apparel, may be seen in process of manufacture, within a few feet of the plant still laden with the opening seeds, from which the material of the thread is plucked whenever it is required.

In the circular gate-houses leading to the courtyards of the better classes the blacksmiths may be seen making hinges, nails, and other common articles from native iron. The same sort of ore that is to be found at Sierra Leone is also to be found in the interior. But though it is neglected on the coast, it is smelted in rude furnaces at Kambia, and is the material from which the blacksmiths make all the iron articles required in that district.

The negroes of the interior may also be seen tanning leather, colouring it with native dyes, and making sandals, shoes, and saddles.

In every village they are busy manufacturing oil for their own consumption and for the European markets. The value of the oil so manufactured and exported last year to Europe exceeded £400,000. This manufacturing industry is altogether carried on by the negroes beyond our settlements.

At Elmina there are a considerable number of natives who have been trained by the Dutch as masons, carpenters, and blacksmiths. The native houses are strongly built of stone. At Cape Coast, eight miles off, the native houses are built of mud, and there is very little attempt at industry to be seen.

The German missionaries at Akropong give technical instruction in their schools. They are zealous, and live in a healthy district, but, as yet, they have made no impression beyond a very limited area.

At Lagos, the liberated Africans, who have emigrated from Brazil, are disposed to be industrious. In this respect they are a great contrast to the liberated Africans of Sierra Leone. They number about 6,000, and are rapidly increasing.

The chief articles of export are Gold Dust, Palm Oil, Cotton, Indigo, Shells, Ground Nuts, &c.

The articles exhibited by Mr. Pope Hennessy, C.M.G., lately Administrator-in-Chief, and Mr. Salmon and others, in behalf of the West African Settlements, are specimens of the characteristic Trinkets of the Settlements, a Collection of Land Shells, Fancy Groups of Leather, Articles of Food, Specimens of Gold Dust, Monkey Skins. Ropes of Ashantee Make, Pipes and Smoking Reeds, Sandals, Wallets, and Native Manuscripts, Native Looms, &c.

### JAMAICA.

Jamaica lies between  $17^{\circ} 39'$  and  $18^{\circ} 36'$  North latitude, and between  $76^{\circ} 3'$  and  $78^{\circ} 34'$  West longitude. It is calculated to contain about 6,400 square miles, or 4,080,000 acres. A range of mountains runs from East to West, occasionally rising to a considerable height, especially near the East-end, where the Blue Mountain Peak is found to be about 7,600 feet above the level of the sea. Mr. J. G. Sawkins, F.R.C.S., from observations taken in July, 1861, makes it 7,318 feet. On the North side the land rises into hills, often of remarkable beauty, and commonly separated from each other by spacious vales and romantic rivulets. On the South side, the face of the country is more irregular and craggy, and several ridges of less elevation are formed, running nearly parallel to the principal one. Extensive plains or savannahs extend from the bottom of the lowest range to the sea. Much of the soil, especially in the higher mountains, is unfit for cultivation, and probably not more than one half of the land which the island contains has yet been granted to individuals.

The principal rock of Jamaica is a white lime-stone of recent formation. Some of an older date (Graywacke, &c.) are to be met with in the mountains, chiefly in the County of Surrey, and in the parish of St. Mary, in Middlesex, as well as a great variety of those rocks (supposed of igneous origin), known to Geologists under the general name of Trap-rocks. The remains of a volcano are distinctly visible in the parish of St. George.

The climate is very salubrious, though occasionally sultry. Being an island, the thermometer is never observed to rise so high as on continents of similar latitude. In the plain of Liguanea, about three miles from Kingston, and 212 feet above the level of the sea, the mercury generally stands, during the warmest weather, at  $89^{\circ}$  to  $90^{\circ}$ , and during the cooler at about  $85^{\circ}$ ; it has been occasionally seen as high as  $93^{\circ}$ , and as low as  $63^{\circ}$ . The barometer, kept at the same situation, does not fluctuate during the year more than 2-10ths of an inch, say from 29.80, to 30.00, except on some particular occasions.

For several years now Jamaica has been strongly recommended by the Medical faculty of England, the United States, and Germany, as a climate well suited for invalids and others threatened with chest complaints or of delicate constitutions. Many invalids have therefore visited the country, and benefitted by the change; and many remain, preferring the climate to that of their own land. Establishments for the reception of invalids have been opened in the Port Royal and St. Andrew's mountains.

Among the mountains the temperature varies much, according to elevation and exposure. The meridian sun is everywhere felt oppressive by those who have not been long accustomed to its influence.

The island is divided, according to an Act of the Legislature passed 1758, into three counties—namely, Middlesex, Surrey, and Cornwall.

Formerly these were subdivided into twenty-two parishes, but by an Act of the Council passed in 1867 the number was reduced to fourteen, viz.:—In *Middlesex*, St. Catherine, Clarendon, Manchester, St. Mary, and St. Ann; *Surrey*, Kingston, St. Andrew, St. Thomas, and Portland; and *Cornwall*, St. Elizabeth, Westmoreland, Hanover, St. James, and Trelawny.

The Political Constitution, as represented by the Legislative Council and Assembly, was abolished by an Act of the Legislature in 1866, when the Island became a Crown Colony. The constitution at present provides for a Governor, Privy Council, and Legislative Council, the latter consisting of thirteen members, all appointed by the Crown, and of whom six, besides the Governor, are paid officials.

Saint Jago-de-la-Vega, or Spanish Town, used to be the Seat of Government, but it is now transferred to Kingston, which is the principal commercial city. It is here that the commerce of the island is centred, and from its favoured geographical position, as well as from its spacious natural harbour, one of the finest in the world, it offers a convenient port of call to the many lines of steamships now trading in these waters. Fresh Provisions, Vegetables, Water, Coals, and every other necessary for steam or sailing vessels, can be procured readily at very moderate rates. The other principal seaport towns are Port Morant, Morant Bay, Salt River, Milk River, Black River, and Sav-la-Mar on the south coast; and Lucea, Montego Bay, Falmouth, St. Ann's Bay, Port Maria, Annotto Bay, and Port Antonio on the north side.

The principal articles of export are Sugar, Rum, Coffee, Pimento, Ginger, Arrowroot, Logwood, Fustic, Ebony, Brazalitto, Lignum-vitæ, Satin Wood, Bitter Wood, and Cocoanuts. Cotton and Indigo were at one time considerable articles of export, but they have long since ceased to be cultivated.

The island abounds with every variety of Tropical Fruits, which are produced in the greatest profusion and without cultivation. Oranges, Bannanas, Pines, &c., find a ready and profitable market in the United States.

The population of the Island, according to the Census, taken 5th June, 1871, was 506,154, as follow:—

	Males.	Females.	Total.
White	6,909	6,192	13,101
Coloured	48,048	52,298	100,346
Black	191,498	201,209	392,707
		Total .. .	506,154

The production of Tobacco in quantity and of a quality suitable for export, is a comparatively new industry in Jamaica. The plantations of Messrs. Soutar & Co., whose cigars are exhibited, are within 15 miles of Kingston, and were established four years ago upon soil similar by analysis, and in a climate corresponding with that of the famed Vuethaboy's district, Havanna. Their seed was also received from, and is of the description grown in the Vuethaboy's. Their manufactory is in Kingston, the capital of the Island, where they give constant employment to about 100 hands in the preparation of the tobacco and manufacture of cigars and cigarettes. The cost of freight from Jamaica to the principal ports in Great Britain is about 3s. per thousand, and to the Continent from 3s. to 3s. 6d.

## BAHAMAS.

A group of twenty inhabited islands, and an immense number of islets and rocks, lying between  $21^{\circ} 42'$  and  $27^{\circ} 34'$  North latitude, and  $72^{\circ} 40'$  and  $79^{\circ} 5'$  West longitude, which were finally annexed to Great Britain in 1788. The capital of the colony is Nassau, in New Providence. The revenue is about £41,000 a year. The population, 39,162. The annual value of exports is about £150,000 per annum. The principal island, New Providence, was originally settled by the English in 1629, and held till 1641, when it was seized by the Spaniards. It was again colonized by England in 1667, but afterwards fell into the hands of the Spaniards and French. In 1781 the Bahama Islands were surrendered to the Spaniards, but, at the conclusion of the war, they were confirmed to Great Britain by the Peace of Versailles, 1783.

*Exhibited.*—Ornaments from the Seed of the Mimosa and Sea-side Oat; Shell Work and Fish Scale Ornaments; Back of Hawksbill Turtle and Conch Shells; Fibres of Plantain, Banana, Pineapple, &c., indigenous to the Bahamas; Fans, Rope, &c., made from the Palmetto Leaf; Sponge; Native Woods and Bark; Wings of the Flamingo.

Cigars exhibited by MESSRS. SOUTAR for submission to jury:—Imperiales, Regalia Britannica, Regalia del Rey, Napoleones Elegantes, Brevas, Londres, Galanes.

## TRINIDAD.

Lies to the east of Venezuela. Ceded to Great Britain in 1802. The area of the island is  $1,754\frac{1}{2}$  square miles. Revenue about £264,000 a year, and value of exports, in 1871, £1,492,811. The population amounts to 109,638.

The principal articles of export are Sugar, Rum, Molasses, Cacao, Coffee, and Pitch. The number of Sugar Estates is 150, and the number of Coffee and Cacao Estates about 800.

77,452 acres of land are under cultivation. Cotton, Timber of many kinds, and the choicest West Indian Fruits are also produced.

*Exhibited.*—Collection of Native Woods, Pitch, Fibres, and Cacao. (These goods, although promised, have not yet been received.)

# THE KIRKSTALL FORGE COMPANY,

*Leeds, Yorkshire, England.*

## Iron Manufacturers, Engineers, Iron and Brass Founders.

PRIZE MEDALS, LONDON EXHIBITIONS, 1851 AND 1862, FOR RAILWAY WHEELS AND AXLES, AND LOCOMOTIVE ENGINE AND CARRIAGE TIRES, AXLES AND BAR IRON; ALSO GOLD PRIZE MEDALS MOSCOW EXHIBITION, 1872, FOR THE ABOVE AND STEAM HAMMERS.

BAR, ROD, and PLATE IRON, and FORGINGS of every Description.

WELDLESS RAILWAY WHEEL TIRES, and LOCOMOTIVE CRANK, and RAILWAY CARRIAGE AXLES, manufactured solely from Coldblast Pig Iron, refined and selected.

RAILWAY WHEELS and AXLES.

Also AXLES for ROAD CARRIAGES and WAGGONS.

THE KIRKSTALL FORGE COMPANY are the sole makers of NAYLOR'S PATENT SINGLE & DOUBLE ACTION STEAM HAMMERS.

These hammers are made of all sizes, from  $\frac{1}{2}$  cwt. up to 50 tons.

The advantages of the Double Action Steam Hammer for Forging are, its being capable of being worked up to 200 strokes per minute, or from three to four times faster (when required) than any other hammer; the power can be more than doubled, and the length of stroke and force of blow altered instantaneously.

The Company are sole makers of HASWELL'S PATENT HYDRAULIC FORGING PRESS.

## Manufacturiers de fer, Constructeurs, Fondeurs en Fers et Cuivres.

MÉDAILLES OBTENUES AUX EXPOSITIONS DE LONDRES DE 1851 ET 1862, POUR ROUES, ESSIEUX, BANDAGE DE ROUES DE LOCOMOTIVES ET WAGGONS, POUR TOUS LEURS ESSIEUX ET FERS EN BARRE; AUSSI MÉDAILLES D'OR DE L'EXPOSITION DE MOSCOW DE 1872 POUR LES SUS-MENTIONNÉS, ET MARTEAUX PILON.

FERS en BARRES, RONDS, en TÔLE et FORGÉS, &c.

BANDAGES SANS SOUDURE de ROUES POUR CHEMINS de FER. BIELLES de LOCOMOTIVES et ESSIEUX de WAGGONS, en fer forgé à Cold-blast, raffiné et choisi.

ROUES et ESSIEUX POUR CHEMINS de FER.

ESSIEUX pour WAGGONS et VOITURES ORDINAIRES.

LA COMPAGNIE des FORGES de KIRKSTALL est la seule qui construise les MARTEAUX PILON à DOUBLE ACTION, BREVET de NAYLOR.

Ces marteaux sont de tout poids, depuis un  $\frac{1}{2}$  quintal jusqu'à 50 tonnes.

L'avantage du Marteau Pilon à Double Action consiste en ce qu'il peut frapper 200 coups par minute, ou 3 ou 4 fois plus vite (si besoin est) que les autres; sa puissance peut être plus que doublée, et le nombre et la force des coups peuvent être changés presque instantanément.

La Compagnie est aussi la seule à construire les PRESSES HYDRAULIQUES à FORGER de HASWELL.

**WHITWELL,  
PATENT FIRE-BRICK STOVE**  
 FOR  
 HEATING AIR FOR BLAST FURNACES,  
 HEATING AIRS OR GASES,  
 AND FOR THE  
 CONDENSATION OF FUMES IN METALLURGICAL OPERATIONS

*The reasons why it is exhibited are:—*

1st. That it enables the air for Blast Furnaces to be heated by the combustion of the Waste Gases of the Blast Furnace without any purification of such gases being necessary

2nd. That every portion of the apparatus can be cleansed at any time from the outside, without the necessity of cooling down the apparatus, as is now done in all other plant.

3rd. Its superiority to all other forms of heating apparatus, inasmuch as in these stoves the Burning Gases are compelled, between entering and leaving the stove, to traverse the whole surface of the bricks exposed; the Air Blast in its turn also passes over the identical surfaces previously heated by the gas, and absorbs from them the heat required.

4th. Its commercial importance, as, by this method, the greatest intensity of heat in the Hot Blast for Blast Furnaces may be obtained without damage to the heating material. Its construction renders it adaptable to many other purposes where the presence of fumes renders frequent cleansing necessary.

This stove is constructed of Firebrick, and consists of a series of walls enclosed in a wrought-iron casing, and is provided with cleaning doors at the top and bottom. The price varies according to the value of material and the purpose to which the system is applied, so as to insure the greatest possible economy, as follows:—

PLATINUM AND PRECIOUS METALS  
EXHIBITED BY  
JOHNSON, MATTHEY & CO.,  
HATTON GARDEN, LONDON,

*Smelters and Refiners of Gold, Silver, Platinum, Antimony, Bismuth and Quicksilver, and Manufacturers of Magnesium, Potassium, Sodium, and rare Metallurgical and Chemical Products.*

**PLATINUM STILL**, value 95,000 frs., to concentrate 200 cwts. (10,000 kilos.) Sulphuric Acid per day. This Still is made of Chemically pure Platinum, and combines the most recent improvements in construction. The tenacity and strength of the metal are of the highest degree attainable by careful workmanship. The joints are automatically soldered (*i.e.* without Gold Solder), the absolute perfection and superiority of which process have been proved by the results of working, for many years, more than eighty concentrating boilers of capacities varying up to 650 litres, in use in most of the large and well-known manufactories throughout the world.

**COIL SYPHON**.—Length of Tube 10,000 millimetres, a great improvement upon the ordinary single or double Tube Syphons of 4,000 to 5,000 millimetres in length. It is more convenient and economical in working, requires less space, is less liable to injury, and cools the Acid to an extent quite unobtainable by the old method. A large number are in successful operation.

*An arrangement is attached by which the Syphon empties itself if, by accident or carelessness, the boiler is not properly supplied with Acid, thus affording great protection against the most common cause of injury to these valuable articles.*

**PLATINUM ASSAY APPARATUS**, by the use of which Gold Assays can be made with greatly increased accuracy, rapidity, and economy.

*The especial attention of Mints and Foreign Assay Offices is called to this Apparatus, particulars of which will be forwarded on application.*

**PLATINUM UTENSILS** for Laboratory use. Crucibles, Capsules, Dishes, etc., etc.

**IRIDIO-PLATINUM** Gun Vents for heavy Ordnance, and Standard Weights and Measures, as decided upon by the Paris Commission for International use.

**NUGGET OF PURE PLATINUM**.—Weight, 4,728 grammes of very perfect form (*only one larger specimen is known to exist*); also Platinum Ore from various localities.

**PALLADIUM**.—Ingot of pure Palladium, value 48,000 frs., extracted from native Platinum and Gold of the value of 26,000,000 frs.

Precious and rare Metals; Chemical and Metallurgical Products.

*In the Paris Exhibition, 1867, JOHNSON, MATTHEY & CO. exhibited Platinum Apparatus, Rare and Precious Metals, and Chemical Preparations of the value of 500,000 frs., and were the only manufacturers of Platinum to whom the highest awards were made in each of the three classes under which they exhibited.*

*Fondeurs et Affineurs d'Or, Argent, Platine, Antimoine, Bismuth, Argent-vif, et Fabricants de Magnesium, Potassium, Sodium et Produits Métallurgiques et Chimiques.*

**ALAMBIC de PLATINE**, valeur 95,000 frs., pouvant concentrer 10,000 kilos. d'Acide Sulfurique par jour. Cet Alambic est fait de Platine chimiquement pur et combinant les plus nouveaux perfectionnements. La tenacité et la force du métal sont du plus haut degré que puisse atteindre une manipulation habile. Les jointures sont soudées autogénement, c. à. d., faites sans l'emploi de l'or, procédé dont la perfection et la supériorité ont été établies par l'expérience de plusieurs années; plus de quatre-vingts chaudières, faites d'après le même procédé, et d'une contenance allant jusqu'à 650 litres, étant employées dans les plus grandes fabriques de tous pays.

**SYPHON SERPENTIN**.—La Longueur du tube est de 10,000 millimètres, ce qui est beaucoup plus avantageux que les Syphons ordinaires à tubes étroits de 4,000 à 5,000 millimètres. Il est plus commode et plus économique, occupe moins d'espace, et refroidit l'acide à un degré que ne peut atteindre l'ancien procédé. Plusieurs sont actuellement employés et partout avec le plus grand succès.

*Une disposition spéciale permet le Syphon de se vider de lui-même, quand, par accident ou manque de soins, la chaudière n'est pas suffisamment approvisionnée d'acide. Ce perfectionnement prévient la cause la plus commune des accidents auxquels ces précieux articles sont sujets.*

**APPAREILS en PLATINE**, pour les essais d'or, remplaçant les matras avec plus de précision, de rapidité et d'économie.

*Ces Appareils, dont on enverra, sur demande, des descriptions détaillées, méritent l'attention de la Monnaie et des Bureaux d'Essais Etrangers.*

**INSTRUMENTS de PLATINE** pour laboratoires, creusets, capsules &c.

**IRIDIO-PLATINE**.—Lumières pour canons de gros calibre, étalons de poids et mesures, de la forme adoptée par la Commission de Paris pour usage international.

**PEPISTE de PLATINE PUR**, pesant 4,728 grammes, de forme parfaite (*on ne connaît qu'une seule pépite plus grosse que celle ci*); Minéraux de Platine de différentes localités.

**PALLADIUM**.—Lingot de Palladium pur (valeur 48,000 frs.), extrait de Platine et d'or natifs, de 26,000,000 frs. de valeur.

Métaux rares et précieux; Produits Chimiques et Métallurgiques.

*À l'Exposition de Paris en 1867, JOHNSON, MATTHEY & CIE. exposèrent des Appareils de Platine, des Métaux rares et précieux et des Préparations Chimiques, d'une valeur de 500,000 frs., et furent les seuls fabricants de platine qui obtinrent les plus hautes récompenses dans chacune des trois classes de leurs produits.*

MANUFACTURED BY

THOMAS OGILVIE SMITH, EDINBURGH.

REPORT BY DR. STEVENSON MACADAM.

ANALYTICAL LABORATORY,  
SURGEONS' HALL,  
EDINBURGH, 6th March, 1873.

I have made a careful Chemical Analysis  
of a sample of the “EDINBURGH LIQUID  
BLUE,” manufactured by Mr. Thomas  
Ogilvie Smith, Edinburgh, and find it to be  
composed of the best materials, to be free  
from any injurious ingredient, and to be in  
all respects of the best quality, and superior  
to any other Liquid or Solid Blue I have  
examined.

J'ai analysé avec un très grand soin un  
échantillon du “BLEU LIQUIDE D'EDIM-  
BOURG,” fabriqué par M Thomas Ogilvie  
Smith, d'Edimbourg, ce qui m'a donné lieu  
de constater qu'il contient les meilleures  
substances ; qu'il est entièrement exempt  
d'ingrédients délétères et, enfin, qu'il est  
de première qualité et supérieur à tout autre  
Bleu Liquide ou Solide soumis à mon examen.

PRINCES SQUARE, WILSON STREET, FINSBURY, LONDON.  
Works:—Tanner's Hill, Deptford, Kent.

These Plumbago Crucibles are used in the Royal Arsenals and Dockyards of Great Britain, and also in those of several Foreign Governments, where they have obtained notability for economy, non-absorption of metal, durability, and freedom from cracking. They are also used extensively by the principal firms of London, Birmingham, and other large towns of England and the Continent. They obtained the First Class Silver Medal (the only one awarded by the Jury), at the Paris Exhibition of 1867, and also a Certificate of Superiority from the Secretary, by whom they were tested, against those of other manufacturers.

## STOCKTON-ON-TEES, ENGLAND,

Sole Manufacturers of

Moore's Patent Differential  
Pulley Blocks, and  
Moore & Head's Patent  
Hand Hoist.

These PATENT BLOCKS possess many advantages over all others which have been introduced to the public. They will raise the maximum load with a minimum power exerted. They are very simple, and not liable to get out of order. The lifted weight cannot run down of its own accord when suspended. Both chains take an equal share of the load lifted, thus distributing the weight, and causing the Blocks to hang perfectly plumb. The chain is stronger than usual, to prevent any chance of the links stretching.

The PATENT HAND HOIST is specially constructed to enable one man to raise heavy weights with ease and rapidity. It is simple in arrangement, strong in construction, and easy to move about. It can be fixed to any beam or bar, and supplied with chain for any length of lift. It is (when ordered) fitted with an effective brake, by which means the load, when being lowered, is entirely under the control of the man.

Although these Patent Blocks and Hoists have been introduced to the public only a few months, thousands have been sold, and they are now adopted by the largest engineering and other houses in England.

Seuls fabricants des

Poulies différentielles de Moore, brevetées,  
et des Monte-Charges à bras de Moore  
et Head, brevetés.

Ces poulies différentielles offrent des avantages réels sur toutes celles en usage. On lève avec elles le maximum de charge avec le minimum d'effort. La charge, une fois en suspension, ne peut descendre par elle-même. Les deux chaînes portent une partie égale du poids de la charge, ce qui, produisant une distribution régulière du poids, fait que les poulies sont continuellement d'aplomb. Les chaînes sont plus fortes que d'ordinaire.

Le monte-charge est construit de manière à permettre à un seul homme d'élever facilement et rapidement un poids considérable. Le mécanisme est simple, solide et facile à manœuvrer. Il peut être attaché à une poutre ou traverse quelleconque et est muni d'une chaîne pour toutes les hauteurs d'élévation. Cet appareil est muni, si on le désire, d'un frein par lequel le fardeau, pendant la descente, est directement sous le contrôle de l'ouvrier.

Quoique ces poulies et monte-charges ne soient mis en vente que depuis peu de mois, il en a été déjà livrés plusieurs milliers, et ces appareils sont aujourd'hui généralement adoptés dans les grandes usines de l'Angleterre.

## LAWRENCE'S Patent Capillary Refrigerator

Which has obtained numerous Prize Medals, may be seen at their Stand, No. 515, Class XIII. and XVIII., and in use at the British Club at the Exhibition.

This Refrigerator is constructed of corrugated copper. Its wonderful efficiency is due to the capillary action of the corrugated surfaces, over which the hot liquid flows in a thin film, while the cooling water (also in a thin film), passes internally in a diametrically opposite direction.

GRAY'S  
"ANGLESEY" ARTIFICIAL LEGS,*Recommended above all others by the most eminent Members of the Medical Faculty.*

These Legs were worn by the late Field Marshal the MARQUIS OF ANGLESEY, K.G., who lost his leg at the Battle of Waterloo, and whose walking and riding excited, equally, the astonishment and admiration of all beholders.

Mr. PHILIP GRAY,

7, CORK STREET, BURLINGTON GARDENS, LONDON, W.,

SUCCESSOR to his Brothers, WILLIAM GRAY (deceased), and FREDERICK GRAY (retired), whose high reputation as inventors and makers of Artificial Limbs, is too well known and appreciated to require comment.

Mr. P. GRAY has been for upwards of twenty years a Pupil and Partner with his Brother, FREDERICK GRAY, and for the last ten years principal working Partner in the late Firm of F. & P. GRAY, at the above address; he was constructor to the late Colonel Sir THOMAS ST. VINCENT TROUBRIDGE, BART., K.C.B., who lost both legs at the Battle of Inkermann, and yet was enabled, by means of these Artificial Limbs, to ride and walk with ease and facility.

These Legs have been extensively supplied to German and French Officers, amputants from the recent war, and in every case with complete success. Mr. GRAY possesses a valuable collection of voluntary Testimonials from his numerous clients, among not only the Officers of the British Army and Navy, and the English Gentry, but also from numerous Foreign patients holding high positions, who in almost every case had previously made sundry experiments with other Artificial Legs unsuccessfully.

FITTING AND ARTICULATION—*Mr. Gray can with confidence assert that his special system of fitting and articulating an Artificial Limb, provides the wearer with the easiest exercise of volition in motive power that has yet been achieved by mechanical contrivances applied to this purpose.*

*Second Edition, price 7s. 6d.*  
GRAY'S AUTOMATIC MECHANISM, A WORK ON ARTIFICIAL LIMBS. Dedicated, by SPECIAL PERMISSION, to the late SIR BENJAMIN BRODIE, BART. Contains 100 Illustrative Cases. H. RENSHAW, 356, STRAND, LONDON.

**ELECTRICITY IS LIFE**

PULVERMACHER'S PATENT

**GALVANIC CHAIN BANDS, BELTS,  
POCKET BATTERIES,**

RECENTLY IMPROVED,

*Approved by the Academy of Medicine at Paris and other Medical authorities in England and abroad.*

These Self-Applicable Physical Curative Appliances, unlike noxious Drugs, are perfectly harmless and of an efficacy vastly superior to all other external remedies.

Owing to the physiological, physical, and chemical effects of the Electricity gently and permanently imparted into the system, they exercise an internal action, promoting the digestion, circulation, and nutrition, thereby assisting Nature in her efforts to restore the normal balance of health and vigour in a debilitated constitution; hence the remarkable cures they daily effect in cases of *Rheumatism, Lumbago, Sciatica, Neuralgia, Gout, Head and Tooth Ache, Indigestion, Liver Complaint, Paralysis, Nervous Deafness, Epilepsy, General and Local Debility, Functional Disorders, &c., &c.*, after all other remedies have failed, and thus popularising Electricity in accordance with the authentic encomiums in the Medical and Scientific Press.

Recent improvements in these appliances by the Inventor render their self-application extremely comfortable and effective, and thus remediate former inconveniences.

Scientific extracts and a selection of the daily increasing number of testimonials, together with price list, are embodied in pamphlet, "GALVANISM NATURE'S CHIEF RESTORER OF IMPAIRED VITAL ENERGY," sent post free on application to

**J. L. PULVERMACHER'S GALVANIC ESTABLISHMENT,**  
168, REGENT STREET, LONDON, W.

**TODD'S MAGIC TINCTURE,**

*For the instantaneous removal of Neuralgia, Tic-doloreux, Painful Affections of the Face, or Tooth-ache.*

Paint with a Camel's-hair brush freely three times in succession the track of the Nerves, or where pain is felt, which instantly ceases.

For Tooth-ache, drop a few drops on cotton wool, and apply quickly to the affected Tooth, shutting the mouth instantly.

# UNITED STATES 1776—INTERNATIONAL EXHIBITION—1876

IN  
*Commemoration*  
OF THE  
ONE HUNDREDTH BIRTHDAY  
OF THE NATION.

THE Congress of the United States of America having enacted that an International Exhibition should be held in the City of Philadelphia, in 1876, public attention is now invited to the proposed programme.

This Exhibition is to be international and universal—international, inasmuch as all nations will be invited to participate in it; and universal, because it will include a representation of all natural and artificial products, all arts, industries, and manufactures, and all the varied results of human skill, thought, and imagination.

The outlines of a simple yet comprehensive classification have been adopted. There will be ten departments, each subdivided into ten groups, and these again into classes. The details of this classification are now being elaborated, and will be published in due season, together with such rules and regulations as may be found necessary for the proper conduct and management of the Exhibition.

It is intended that ample space shall be assigned to each state, territory, and foreign country, for a just and proper display of its products. It is believed that not less than fifty square acres of floor space, under roof, will be required for this purpose. A site combining the advantages of a sufficient extent of level ground, with picturesque and cultivated surroundings, easy of access by rail, by water, and by ordinary roads, has been assigned for the buildings in the grounds of Fairmount Park, in the City of Philadelphia.

The Exhibition is to be opened on Wednesday, April 19th, 1876, with appropriate ceremonies, in which the President of the United States, the Members of the Cabinet, Governors of States, Senators, &c., together with Representatives of all Foreign Nations, will participate.

A cordial invitation is extended to every nation of the earth, to contribute illustrations of its arts, industries, progress, and developments.

Hon. DANIEL J. MORRELL,  
*Chairman of Exec. Com.*

Hon. LEWIS WALN SMITH,  
*Secretary.*

HON. JOSEPH R. HAWLEY,  
*President.*
